

## To order Dauber Bottles and Sponge tops for the bottles:

Go to [www.duffystric.com](http://www.duffystric.com) and sign up for an account; then order.

**Applicator Bottle – Item 2257 -\$3.59 each** (That was price last time I ordered)

Can be found on their website by simply entering “2257” in search field.

Duffy’s has a minimum \$45.00 order requirement.

## Source for replacement tips:

Forestry Suppliers, Inc.

- [Weed Wand Magic Replacement Tips, Pack of 3 \(18023\)](#)  
**\$5.00**

These are more expensive, but I've found that the Duffy's tips seem to begin dripping after a while when the bottle is turned upside down, where the Forestry Suppliers tips do not. The bottles do not come with the tips, so you need to purchase them separately, anyway. (Note: I do *not* recommend the whole Forestry Suppliers “Weed Wand” product -- you can't effectively kill woody stem invasives by being lazy standing up; you must cut the stumps within an inch of the ground, or as close as possible to the root crown, so you need to bend down and push aside leaf litter (or as much as possible) to cut it before daubing it. This reduces later stump sprouting.
